I reviewed the files supplied by Eric. I think the data fields are suitable for the project.

In the data supplied by Scott's, there is a number in the lower right hand corner of each page (SC-EPA-00000). Please make sure this number is included in the data record.

Subject University of Cincinnati - Marysville Vermiculite Exposure
Assessment Data Collection

Greetings,

In keeping on track with our project time line, I have attached the Excel file containing variables that may be obtained during the raw data entry process. This will complete step 1 of the process plan discussed on 5/28/2009 at UC. In addition, I have attached a Word document containing a screen shot of the data entry interface that will be used by our data entry personnel. In that same Word document, a list of the same variables as in the Excel file appears but with additional description and formats. Please let me know as soon as possible if additional items are needed for step 1.

Thank You,

Eric
